

Hi, my name is Márton Balassi. I live in the Northern part of Hungary in a small town called Vác. I am 17 years old and attend the specialized English class of Boronkay György Secondary Grammar School in Vác, where I study German as a third language. I have an advanced English language exam and currently I am preparing intermediate German language exam. In my free time I usually study and go out with my girlfriend. I also pay attention to keeping my body fit, so I go to the gym four times a week. I live with my parents and my sister and my brother in a detached house, but when I finish school I would like to move in with my girlfriend (she is going to be a guide too). I have other plans for the future too. I would like to go to university and study Chemistry and Genetics to become a chemist or researcher. I love chemistry and sciences in general. This is one of the reasons why I wanted to be a guide. I often go to scientific competitions and I am member of Mensa HungarIQa. I am a kind of a talkative person and I make friends easily. I am looking forward to this summer event, because I think it will be very exciting and a great adventure for me.
