

My name is Eszter Lovas, I am 23 years old. I study Mathematics and Biology at ELTE University of Sciences. I would also like to teach these subjects at school. I am doing my teaching practice in secondary schools this semester and I really enjoy it.

I have three younger sisters. Ildi, the second one is fond of Chemistry.

I sing in a little choir where we sing songs like spirituals and renaissance polyphonic songs. Though not too often, we sometimes also perform these for an audience. I like dancing, swimming and I do gymnastics. I like travelling abroad and taking part in canoe-tours and bike-tours. We often plan excursions with my friends from the University. We usually rent an old house in a village or in the middle of the forest, and party.

I look forward to seeing you and going to Gödöllő.
