

Hi, my name is Gergely Cserép, I will be 21 in August and hopefully will guide you well enough that you will want to come back once again! Now a little bit about myself: I study chemistry at the Faculty of Science of Eötvös Loránd University; I am/was a second year student. Although I like studying (especially chemistry, biology and informatics), what I most like is being with my friends and my girlfriend. I also have a few hobbies like reading, origami (making figures from colored paper), strategic computer games, hiking and sport (mostly sports played with a ball, i.e. football, tennis, etc.). I read and speak English fluently (at least I assume we won't have any problems with the language) and I speak German a little if needed. If everything goes as planned I will be the guide of 8 or 9 groups who travel on the same bus and I hope we will have a good time together. See you in July; I can hardly wait to meet you!

Gergő
