

Hi,

My name is Katalin Pajkossy (Kate). As a member of the guide team my task will be to guide you at the buses – on one hand I'm sorry that no group is assigned to me, on the other hand perhaps I can meet more people. I am from Budapest, studying mathematics at the Eötvös University for one year. Apart from math, many other things are interesting for me, e.g. have been playing piano for a long time. I can speak English and German and understand some Italian. I am very glad and looking forward to participating in this project; and am completely sure that all of us will enjoy it.
