

My name is Anna, I am 21 years old and I live in Budapest. I have been learning English since I was 7 and French since I was 14. I was admitted to the university (ELTE) in 2005 to the French major and in 2006 to the English major. Since last year September I am also studying at a guide course. It is a kind of hobby for me, because I am really passionate about it, but I also would like to do it as a profession, later on. Another alternative of my future would be to become an English and French teacher, whether in a secondary school, or in a private language school. I already started private teaching, among the university, some years ago, so I have some practice in it. I think it is a big fun; I like to teach, no matter whether my student is a little child, an adolescent or an adult.

Apart from all these things, in my free time (if I have any...) I like to go out, to relax a little and enjoy myself in the company of my friends. We go to cinema, club, restaurant, or simply walk around in the city a little. When I stay at home in my free time I usually cook, read, or listen to music. I like various types of music, by the way, the most typical being rock or jazz (if I listen to it at home), or hip-hop and RNB (if I go to club), but I also like Latin music like cha-cha-cha, rumba, samba as I used to learn dancing for several years. Unfortunately, I do not learn it anymore, because I am very busy, but I still have the dream to continue it one day. And of course, I am really looking forward to welcome my French students in Hungary, who I am going to guide in these 10 days. Being their guide is challenge for me, to tell to truth, but it inspires me, I will be happy to meet them, and I do hope I can live up to their expectations.

Anna Moór
