

My name is Eszter, this means Setare in Persian, and I like this name. I'm a 21-year-old student at the ELTE University, Budapest. I have been studying Arabic and Farsi for three years. My interest is Persian culture, and I would like to learn the Persian language very well. I'm a really social person, because I have been living at a dormitory for three years. During my free time I read tales, go to the cinema or meet my friends.

I used to dance and I was also dancing in competitions. I also used to play the clarinet. Today I don't go dancing very often although I love rocky dance!

I had the opportunity to visit Iran two times and I was astonished by your country, it was wonderful to be there, and I hope, I can return soon. I will do my best to help you enjoy your stay in Hungary, and to get you acquainted with our country.

Eszter Kasza
