

I'm Bálint Balázs, 20 years old, currently a med student at Semmelweis University, Budapest. Once, I myself was quite good at chemistry, and participated in the Olympiad in Moscow. I'm interested in genetics research, and I started to work within the Union of Research Students this January. I'm also interested in other natural sciences, such as physics, chemistry and mathematics. In my free time I like playing on my computer (RPGs mostly), reading books, hanging out with friends. Unfortunately I don't really do many sports, but I like ice-skating in the winters.
