

My name is Zoli. I am a graduate of the University of Budapest (ELTE) with an MA in Historical Studies. Currently I am working as a history teacher in a Primary/Secondary School. I am also pursuing a MA in the Spanish language and I have experience working as a tutor. I really enjoy what I do but my passion is for traveling and gaining the opportunity to know foreign cultures better. I have lived and worked abroad in the US and have been a tourist in Mexico City. My experience in Mexico city motivated me to apply for this experience and have the opportunity to work with the Mexican delegates. I am looking forward to exploring the nuances of Mexican Spanish and always an excited to apply my studies in conversation.

In my spare time I enjoy basketball, football, swimming, and jogging. I am committed to my guitar and also spend time composing with a band. I believe creative and expressive talents are essential for good communication and I look forward to engaging these skills.

I am eager to live up to the expectations of the program and really look forward to working with the participants of the International Olympiad of Chemistry. I can't wait to get to know the staff and connect with my group! ¡Ale Mexico!

Zoltán Gilly
