

Hi, my name is Márton Estók, people usually call me Marci. What you should know about me in advance is that I am absolutely open to any question with regard to the tournament or the city. About my personality I would say that there is nothing to which I would say „I don't know.". Except for Chemistry, but that's your job, right? All in all, I wished to participate in this program as a guide, because I am firmly convinced that you, competitors need people with strong organizational and linguistic skills, therefore I believe that I'll be a convenient partner for you. Actual key facts in which you might be interested: I'm 18, I've been learning to play the piano for 5 years, and I have taken part in Debate Competitions, both with lots of success. I also speak German in a nearly advanced level. Until now, I learnt in one of the best high schools of Budapest, in this year I had my final exams. I plan to study commerce. I usually prefer people with natural intelligence; I can't stand inconsistency and people without opinion. I look forward to meeting you at summer.
