

I'm a great fan of art, history and astronomy. Sometimes I find myself just too lost in science fiction. It has some clear facts as a start but then just images about technology, spaceships, intergalactic adventures and of course about the meaning of life. I'm also member of the Hungarian Astronomical Association as an amateur.

I play the piano in my free time; I had years of classical lessons now I'm taking jazz lessons. Tori Amos is my idol wish I could do like she does. Can't imagine life without music, I like either rock, pop, goa, classic, jazz and alternative music for different acoustical reasons.

I study aesthetics, wish one day I could publish my own novel. In my free time I like traveling, going to party, observing the stars, swimming, reading, playing the piano and writing.

My mother is Ukrainian, grandmother lives in Borispol. I visit her every summer, I've learned Russian and Ukrainian from her by watching her favorite soap operas and playing „durak” all night long. She also trained me vodka-drinking (poor me☺) I have some relatives in Svetlovodsk and friends in Kiev and Krim. This is my second native land, so close to my heart, so many sweet memories.
